Tanta, Egypt | Open to Relocation

Professional Summary

Junior Flutter Developer with experience building and publishing mobile applications on Google Play and the App Store using Flutter. Open to opportunities in startups, enterprises, and software houses, with flexibility to work on-site, hybrid, or remotely. Focused on performance, scalability, and user experience.

Work Experience

Coding Instructor (Demi Level) at iSchool, Remote

April 2026 - Present

- Guided students to build 10+ projects and complete 25+ tasks.
- Taught programming basics and problem solving concepts to 20+ students.

Coding Instructor at Shark Academy, Elsanta, Egypt

October 2024 - March 2026

- Taught Python, C, SQL, data structures, and algorithms to 100+ students.
- Introduced Flutter, Dart, OOP, and software development concepts to students.

Flutter Intern at National Telecommunication Institute (NTI), Tanta

December 2025 - March 2026

- Built +5 Flutter applications and completed +16 technical tasks with a 100% grade.
- enhanced code quality in +4 Flutter projects using clean code principles.

Mobile Development Intern at GDG Al-Azhar, Remote

February 2025 - August 2025

- Completed 25+ technical tasks and contributed to building 7+ mobile projects.
- Integrated REST APIs and collaborated within a mobile development team.

Education

Bachelor of Computer Engineering at Tanta University, Tanta, Egypt

October 2020 - July 2025

Grade: Graduation Project: Excellent

Studied Computer Engineering fundamentals including OOP, Data Structures, Algorithms, Databases, Operating Systems, and Software Engineering.

Technical Skills

Programming Languages: Dart, C++, Python, SQL

Frameworks: Flutter (Android, iOS, Desktop)

Databases & Local Storage: Firebase, Supabase, Hive, Sqflite, Shared Preferences

State Management: BLoC, Cubit, Provider

Architecture: Clean Architecture, MVVM, MVC, SOLID Principles, Design Patterns

APIs & Services: REST APIs, Google Maps API

Testing & Deployment: Unit Testing, CI/CD

Tools & Platforms: Git, GitHub, Postman, Figma, Android Studio, VS Code

AI Tools: ChatGPT, Claude, Gemini, Grok, Cursor, GitHub Copilot, Antigravity

Projects

Cartify App • [GitHub](#) • [LinkedIn/Demo](#)

Flutter shopping app built with clean architecture and BLoC state management.

- Built scalable Flutter app using BLoC, Cubit, and clean architecture.
- optimizedDeveloped app performance and API data flow for smoother user experience.

Cashy App • [GitHub](#) • [LinkedIn/Demo](#)

Finance management app built using Flutter and Hive local storage.

- Developed finance management features using Hive for fast local storage.

- Implemented onboarding, splash screens, and structured app navigation.

Smart Feed App • [GitHub](#) • [LinkedIn/Demo](#)

Flutter app for calculating feed ratios with clean architecture and smooth user experience.

- Built real-time calculation features with optimized user input handling.
- Organized media navigation and reduced load time using Shared Preferences.

Club Subscription & Membership System • [Figma](#) • [Demo](#)

A full system built by using React frontend, .NET backend, Kotlin mobile app, and dashboard integration.

- Graduation project for managing club memberships, subscriptions, and user workflows.
- Designed responsive UI/UX screens and improved system workflow using Figma.
